

企业微信接入手册

一、 首先您需要登录企业微信后台，获取如下信息填入平台中

1. 企业 ID
2. 自建应用的 AgentID
3. 自建应用的 Secret

获取方式：

1. 登录企业微信后台，点击【我的企业】，最下方可以获取到企业 ID(或 CorpID)。

2. 点击【应用与小程序】，可以获取到 AgentID 和 Secret。

二、 點擊生成按鈕，在企业微信后台填入如下三個信息：

1. URL
2. Token
3. EncodingAESKey

填寫方式：

點擊【應用與小程序】，選擇【已啓用 API 接收】：

The screenshot displays the '应用与小程序' (Applications and Mini Programs) section of the WeChat Work management console. The 'DeployBot' application is selected, and its status is '已启用' (Enabled). The 'AgentId' and 'Secret' fields are highlighted with red boxes. The '可见范围' (Visible Range) is set to '全部' (All). The '管理员' (Administrators) list includes '母东光 (dongguangmu)', '鍾聖堯 (Taylor Chung)', and '姚維民 (William)'.

Below the application details, there are several configuration cards. The '接收消息' (Receive Messages) card is highlighted with a red box and an orange arrow. It shows '普通消息、自定义菜单操作' (General messages, custom menu operations) and a '查看消息' (View Messages) button. The '已启用API接收' (API Receive Enabled) checkbox is checked.

The 'API接收消息' (API Receive Messages) configuration page is shown below. It contains a table for '接收消息服务器配置' (Receive Message Server Configuration) with columns for 'URL', 'Token', and 'EncodingAESKey'. The 'URL' field is highlighted with a red box. The 'Token' and 'EncodingAESKey' fields are also highlighted. The '编辑' (Edit) and '删除' (Delete) buttons are visible.

Below the table, the '接收的消息事件类型' (Received Message Event Types) are listed: '用户发送的普通消息，自定义菜单操作' (General messages sent by users, custom menu operations).
